

ENGAGE! K12

Bridge the Digital Divide Every Subject, Every Grade, Every Robot!

Engage! K12 is a revolutionary platform that allows **teachers with no programming experience** to use **robots to teach STEM, coding**, and core topics. Aligned with mandated standards and your existing online or printed resources, using Engage! K12 is a seamless **experience that augments every curriculum.**

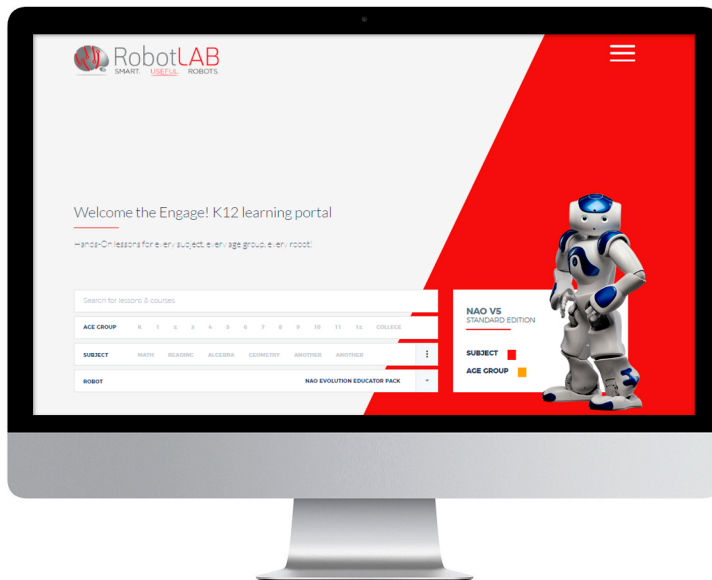

www.RobotLAB.com

Transform any classroom into the most engaging lab in only 3 steps:

1 Choose a Lesson

2 Select a Robot

3 Be a Hero!

 For the **learner**, the material is **fun, hands-on and engaging**. The lessons are **project based**, and through **gamification** and **control of robots** all the **topics are coming to life**. They become **relevant** and easier to understand, leading to **better success and mastery**.

 **Teachers don't need prior experience with robotics** or computer science. using the **easy to use, web-based interface**, they can bring to life **any subject using robots!**

 **Hundreds of ready-to-teach activities** for every age group, for every subject and every robot.

Are you ready to Engage! K12? Join the Engage movement, today!
